

Shapley R^2 decomposition
Income equality (WVS US)

Full model $R^2 = 0.180$, $N = 2,574$ (*pairwise-complete correlations*)

By variable

#	Variable	% R^2
1	confidence in the government	16.8%
2	post-materialist values index (12-item)	15.4%
3	confidence in the environmental movement	15.1%
4	protecting environment vs. economic growth priority	9.1%
5	people who don't work turn lazy	6.1%
6	perceived impact of immigrants on the country's development	5.2%
7	frequency of attending religious services	4.8%
8	importance of religion in life	4.2%
9	household income decile (self-placed)	3.8%
<i>— variables with <3% contribution omitted —</i>		

By cluster

#	Cluster	% R^2
1	institutional confidence	33.0%
2	materialism / ideal lifestyle	15.4%
3	climate/environment concern	11.2%
4	religiosity	9.0%
5	deservingness of poor	6.1%
6	immigration	5.7%
<i>— clusters with <5% contribution omitted —</i>
