

Shapley R^2 decomposition
Government responsibility (WVS US)

Full model $R^2 = 0.299$, $N = 2,577$ (*pairwise-complete correlations*)

By variable

#	Variable	% R^2
1	confidence in the government	18.7%
2	post-materialist values index (12-item)	15.2%
3	confidence in the environmental movement	11.9%
4	people who don't work turn lazy	7.2%
5	perceived impact of immigrants on the country's development	5.7%
6	protecting environment vs. economic growth priority	5.6%
7	satisfaction with household's financial situation	4.9%
8	household income decile (self-placed)	3.1%
<i>— variables with <3% contribution omitted —</i>		

By cluster

#	Cluster	% R^2
1	institutional confidence	31.9%
2	materialism / ideal lifestyle	15.2%
3	climate/environment concern	8.3%
4	deservingness of poor	7.2%
5	immigration	6.7%
6	financial stress/risk	6.7%
<i>— clusters with <5% contribution omitted —</i>
